Details and Background

ALL the protein companies performing these exports such as JBS, Aurora, Marfrig, SADIA, BRF and so on, are large scale industrial businesses. There are no small producers with the ability to export poultry products, especially to China. These companies do not sell directly to international buyers. Most of them have facilities in China and other regions with sales offices, those are selling only to China mainland companies. Currently the capacity is already sold out for the next years

Those companies have a "trading desk" they are selling their production in the futures exchange market, several years in advance, mostly to GACC Exporters, Cold Houses and Global Trading Firms like our local Partners.

CHINESE CERTIFICATION / EXPORTING TO CHINA

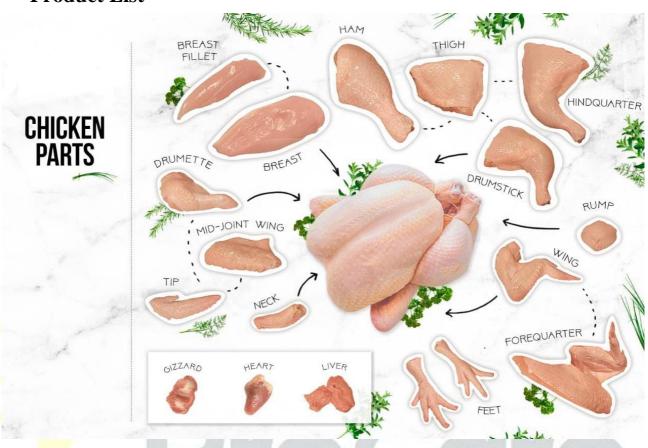

The Chinese government has a strong presence in Brazil, auditing and certifying individual slaughterhouses / cold houses. In Brazil the Chinese Government uses the Brazilian "SIF number" as a key, every specific cold house, at a specific location, has its own SIF number. Brazil has thousands of cold houses, but only those specific ones are certified by the Chinese Government. Per a bilateral agreement with the Brazilian government, in Brazil, only the Chinese-certified cold houses are allowed to ship containers with poultry products destined for China.
